

Records

*Kerry Grooms, NSNF QA
DOE-Idaho*

*Providing for safe,
efficient disposition of
DOE spent nuclear fuel*

National Spent Nuclear Fuel Program

Requirements

- QARD:
 - Defines lifetime and non-permanent QA records
 - For example, auditor training records are lifetime records
 - Defines when to turn the records over to OCRWM i.e., at waste acceptance

Background

- Sites are committed to classifying and retaining QA records as defined in the QARD
- RW has indicated that some SNF QA records will not need to be retained by the repository
 - For example, facility auditor training records

Background, continued

- Some SNF records may be needed for licensing the repository
- Not all of these records may currently be classified as QA records
- A records working group was formed at the RW/HLW/SNF QA records April 27, 2000 video conference

The Issues

- Confusion exists as to which records are:
 - Lifetime for the repository
 - Lifetime for a SNF facility
 - Needed for licensing the repository
- The requirement is to turn over records at waste acceptance
 - Records needed for licensing the repository may need to be turned over earlier

Path Forward

- QA records working group will develop a unified approach for records to support RW

Providing for safe, efficient disposition of DOE spent nuclear fuel
